

## **TurfWorks International gets off to a Vibrating Roll!**

Cookridge Hall Golf Club Ltd., home to a championship 6,788 yards par 72 golf course, have become the first British golf club to purchase a TurfWorks™ system from TurfWorks™ International Ltd.

John Watts (Course Manager) decided to purchase the TurfWorks™ system of True Level Vibro Rollers (just one of the many cassette options available), after having a demonstration of them earlier this year by Simon Gumbrill of Campey Turf Care Systems the local dealer for TurfWorks.

John was so impressed with the system that he knew he had to purchase the TurfWorks™ as he could see what the benefits would be to the greens as well as the club, as there will be no need for him to purchase a separate system in the future when he wants to carry out different operations to keep his greens in perfect condition. All he needs to do is purchase any of the different cassettes, which range from the Thatchmaster, Ultra Grooma, Scarifier, Sarel Roller, Star Spiker, Rotary Brush, Static Brush, and Fixed Brushes for the True Level Vibro Roller cassettes, the chassis is able to accept all these different cassettes.

Commenting on the TurfWorks™ system, John said "I always try to get the best value for money for Cookridge Golf Club on anything I buy, the TurfWorks™ system offers me that and more. The build quality of the TurfWorks system is exceptional, on first viewing this can be seen, built from a large proportion of Stainless steel and using very high quality bearings, no compromise has been made on quality".

"The fact that the TurfWorks™ chassis can take a wide range of units from, Thatchmaster, Ultra Grooma, Sarel Roller and brushes, but the big advantage point is the vibrating greens iron will fit in the chassis working on two rollers so twice ironing effect over single roller systems. The chassis also has a patent

pending adjuster system, so there is no need for a setting bar or spanners, so if some greens need more or less fine tuning or adjustment this can be made on the course by simple turn of a adjuster. The system shows there is no compromise on quality, so it makes it the ideal system for Cookridge Golf Club”.

The TurfWorks™ modular chassis is available for all popular greens mowers and lightweight fairway mowers, with interchangeable cassettes to allow a variety of operations to be carried out.
