

TURFWORKS TAKES OFF IN THE UK

After the successful launch of TurfWorks[™] International Ltd., in the latter half of 2005 and great interest shown in the system at the recent BTME exhibition, it looks like TurfWorks[™] have established their niche in the market sector.

A number of Golf Clubs in the North – West of the United Kingdom have made the decision to purchase the TurfWorks[™] system, from their local dealer, Campey Turf Care Systems, as straight away they could see the benefits, not only in the design and engineering of the product but in the ways that it will benefit their course.

The likes of Dunham Forest Golf and County Club, Royal Liverpool GC, Abbeydale GC, Lancaster GC, De Vere Oulton Hall GC, Harwood GC, Clitheroe GC and Wilmslow GC, will all be seeing to produce and better the fine turf that the golfer expects. With smooth fast and healthy putting surfaces the Thatchmaster will also be used for grooming the fairways and approaches, with the Vibro Rollers used to speed up the putting surfaces and approaches.

With the ability to alter the preferred depth of operation, even on the course, by means of the World Wide Patent Pending Wrenchless Height Adjustment Mechanism, it means that the operator does not have to have to remove the units from the greens triplex mower and no setting bar is required as all they have to do it is "Turn and Click".
